INTER-MISSION

Building Destiny

Capacity Building is much more than training and includes the following

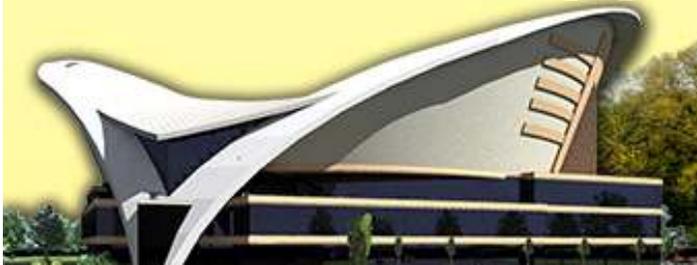

Human resource development, the process of equipping individuals with the understanding, skills and access to information, knowledge and training that enables them to perform effectively.

Building Destiny

Organizational development, the elaboration of management structures, processes and procedures, not only within organizations but also the management of relationships between the different organizations and sectors (public, private and community).

Building Destiny

Institutional and legal framework development, making legal and regulatory changes to enable organizations, institutions and agencies at all levels and in all sectors to enhance their capacities.

Building Destiny

Why is Capacity Building Needed ?

The issue of capacity is critical and the scale of need is enormous, but appreciation of the problem is low.

The link between needs and supply is weak.

There is a lack of realistic funding.

There is need for support for change.

Building Destiny

Training institutions are isolated -
communications are poor.

Development of teaching materials is
inefficient.

Alternative ways of capacity building are
not adequately recognized.
